Stand alone computers

The problem with running UK Info Disk 2000 has been resolved but only when it is set up on a separate computer to UK Info Disk 2004. As a result it will be installed on stand alone computer 2 in the Reid Room.

The problems with updating the library catalogue and with FamilySearch will also be investigated this month.

New online resource

The **1901 census for Ireland** is now available online. It is one of several new websites to be added to the Centre's useful websites section in July – these include a list of Latin names on the Scottish Catholic Archives website, an 1801 census transcript for Dundee on the Friends of Dundee City Archives website, and a database of freeholders (pre-1841) provided by the Public Record Office of Northern Ireland.
